COURSE SYLLABUS

Data Analytics Foundations

Explore how statistics support data analysis. Study descriptive and inferential statistics, distributions, and the roles of predictive and prescriptive analytics.

Group classes (NYC) and onsite training are available for this course. For more information, email corporate@nobledesktop.com or visit: https://training-nyc.com/courses/data-analytics-foundations

Course Outline

Basic Data Analysis

- Measures of Central Tendency
- Measures of Position
- Measures of Dispersion
- The Normal Curve
- Descriptive Statistics

Predictive Analytics I

- Forecasting
- Series Forecast

Data Visualization I

- Charts
- Icon Sets
- Histograms
- Moving Average

Predictive Analytics

- Correlation
- Regression - overview
- Regression - analysis
- Linear regression
- Multiple regression

Probability

- Probability I
- Probability II
- Binomial Probability

- Poisson Probability

Prescriptive Analytics I

- What If Analysis
- Data Table (3 variables)
- Scenario Manager
- Scenario Manager - Pivot

Data Visualization II

- Sparklines
- Color Scales
- Drawing Shapes
- Pivot Tables
- Pivot Charts

Prescriptive Analytics II

- Solver - overview
- Linear Programming
- The Solver model
- Non-Linear Programming
- Evolutionary Solver
