

# Figma Advanced

Enhance your prototyping skills in this Figma Advanced course by mastering variables, modes, and conditionals for more dynamic designs. You'll learn to create interactive elements like tab bars and shopping carts, number and text variables, set up conditional interactions, and build design systems.

Group classes in NYC and onsite training is available for this course. For more information, email [corporate@nobledesktop.com](mailto:corporate@nobledesktop.com) or visit: <https://training-nyc.com/courses/figma-advanced>

## Course Outline

### Section 1

#### Sections in Prototyping

- Using Sections to Organize & Navigate a File
- Using Sections in Prototyping

#### Intro to Variables: Number Variables & Scoping

- Creating, Using, & Editing Number Variables
- Variable Scoping

#### Intro to Modes & String Variables (Text Variables)

- Creating & Applying String Variables
- Creating & Switching Modes

#### Prototyping a Tab Bar: Changing Variants with Variables

- Creating Variants
- Creating a Variable for the Variants
- Making it Interactive

### Section 2

#### Shopping Cart Part 1: Prototyping with Variables

- Defining Products with Variables & Modes
- Connecting Content to the Variables
- Hiding Objects with Boolean Variables
- Adding Items to the Cart

## **Shopping Cart Part 2: Prototyping with Conditionals**

- Defining Cart Variables
- Making the Cart Quantities Work
- Using a Conditional to Avoid Negative Numbers

## **Shopping Cart Part 3: Navigating Modes in a Variable**

- Calculating the Cart Total
- Accessing Modes in a Variable

## **Design Systems: Light & Dark Mode (Variable Collections)**

- Light & Dark Modes
- Variable Collections
- Using Primitive & Semantic Layers to Build a Design System
