

# Introduction to R for Statistical Analysis

The aim of this course is to provide an introduction to R, the environment for statistical computing and graphics. Statistical analysis will be performed through the graphic user interface called RCommander. The focus of the course will be on getting familiar with the R environment, to use R for manipulation and exploration of data, and to perform simple statistical analyses.

Group classes in NYC and onsite training is available for this course.

## Course Outline

Introduction into R Language  
Data Structures  
Data Manipulation  
Graphics  
Basic Statistics and Simulations  
Linear Models, Miscellaneous
