

Adobe Lightroom Classic

This intro course will start from the beginning with importing photos from your camera into Lightroom's catalog. Then you'll see how to edit and organize all those pictures. Optimize and develop photos for printing, create slideshows, create webpages and printed books to share your work, and publish your pictures on social media sites. Last but not least, you'll learn how to keep your photo library safe by implementing backup strategies.

Group classes in NYC and onsite training is available for this course.
