

Intro to Python Programming

Start coding in Python by mastering fundamental programming concepts and syntax from scratch. You'll learn to work with data types, control flow, functions, and object-oriented principles, establishing a solid foundation for building structured programs.

Group classes in NYC and onsite training is available for this course.

Course Outline

Python Fundamentals

Data Types & Variables

- Statements & Expressions
- Variables
- Integers & Floats
- Strings

Data Structures & Attributes

- Functions & Methods
- Lists
- Indexing & Slicing
- Booleans

Structuring Programs

Complex Data Structures & Control Flow

- Dictionaries
- Conditional Statements
- For Loops
- Creating Functions

Packages & Object Oriented Programming

- Classes & Objects
- Modules & Imports
- Packages & Documentation
