Python Data Visualization & Interactive Dashboards

Learn to gather, manipulate, and analyze real-life data in this course, where you'll gain handson experience with Python's NumPy and Pandas libraries. Develop your data visualization skills using Matplotlib, Seaborn, Plotly, and Dash Enterprise, and complete real-life projects that can be deployed online.

Group classes in NYC and onsite training is available for this course. For more information, email corporate@nobledesktop.com or visit: https://training-nyc.com/courses/python-data-visualization

Course Outline

Conducting Advanced Exploratory Analysis

- NumPy array
- Array containers
- · Indexing on an array
- Broadcasting
- Reshaping
- · Universal functions
- Series
- DataFrame
- Slicing DataFrame
- Filtering DataFrame
- Understanding JSON
- · Working with APIs

Building Dashboards and Visualizing Data

- Dash Callbacks
- Client Callbacks
- Pattern Callbacks
- · Dash core components
- Date Picker
- Date Range

- More Dash Components
- Graph
- Dash HTML Components
- Dash Styling

Presenting Information with Conviction and Persuasion

- Dash Styling
- Dash and Bootstrap
- Creating your own Components
- Deployment
- Make a live presentation
